Small Lab. Big Results.

PRINTS FROM NEGATIVES

PRINTS FROM NEGATIVES PRICE LIST AS OF 3/01/05

Prints from negatives are scanned on our state-of-the-art Durst Sigma scanner. This scanner is capable of extremely high resolution and extraordinary detail. After scanning they are color corrected, cropped and printed on our Durst Epsilon LED printer, onto Fuji Professional Color Paper. After printing, orders are double checked for dust/dirt spots, then packed accordingly. Scans are burned to CD as are the corrected files. At your request, we can also print from negatives in our hand darkrooms. Please note that B&W from hand prints is slightly more expensive than B&W from digital scans.

PRINTS FROM NEGATIVES	
Wallets (1-11)	\$1.19
Wallets (12-24)	\$0.80
Wallets (25-49)	\$0.60
